

INSECTICIDES FOR MANAGING NUT PESTS

Ric Bessin, Extension Entomologist

The table below lists the available insecticides and miticides for nut production, the nut trees that they are approved for, and the groups of pests that they target. The table below lists only pest groups, refer to the label for specific pests that these insecticides target. Pesticide names that are in italics represent Restricted Use Pesticides.

Always read and follow the label instructions. You must follow label instructions for pesticide applications.

Pest problems can be common on some types of nut trees, many growers do not have the equipment to apply these materials, particularly with larger trees.
